

# LUXEON Versat 2020 CW 150

## Industry-leading solutions for exterior automotive lighting

LUXEON Versat 2020 is the industry-leading compact solution for modern automotive signaling applications. This family of products provides design flexibility, automotive reliability and ease of integration / manufacturing to facilitate simplified system integration for high volume automotive designs. The LUXEON Versat 2020 CW 150 LED is designed to meet the needs of exterior automotive front lighting applications. All LUXEON Versat 2020 LEDs are AEC-Q102 qualified and cold binned at 25 °C.

### FEATURES AND BENEFITS

- Industry standard footprint for simple integration
- Optimized package drives efficient light extraction
- Low Z profile simplifies optical design and minimizes design space
- Industry leading efficacy

### PRIMARY APPLICATIONS

- Backup/Reverse
- Daytime Running Lights
- Front Fog
- License Plate

# General Information

## Product Test Conditions

LUXEON Versat 2020 CW 150 is tested and binned using a 20 ms monopulse (MP) at 150 mA drive current, case temperature,  $T_C$ , of 25 °C.

## Part Number Nomenclature

Part numbers for LUXEON Versat 2020 CW 150 follow the convention below:

A 1 V B – **A B C D E F G H J K M N P**

Where:

- A – designates product segment (A = Automotive)
- 1 – designates product level (1 = Level 1)
- V – designates product line/family (V = LUXEON Versat)
- B – designates package size (B = 2020)
- A B C D** – designates correlated color temperature (5850 = White)
- E** – designates binning current (A = 150 mA)
- F** – open space (0 = standard part)
- G** – designates generation (1 = first generation)
- H** – designates option for selective binning (0 = standard part)
- J K M N** – designates minimum luminous flux (0048 = 48 lumens, 0058 = 58 lumens, etc.)
- P** – open space (0 = standard part)

Therefore, the following part number is used for a LUXEON Versat 2020 CW 150 with a minimum luminous flux of 53 lumens:

A 1 V B – **5 8 5 0 A 0 1 0 0 0 5 3 0**

## Environmental Compliance

Lumileds LLC is committed to providing environmentally friendly products to the solid-state lighting market. LUXEON Versat 2020 CW 150 is compliant to the European Union directives on the restriction of hazardous substances in electronic equipment, namely the RoHS Directive 2011/65/EU and REACH Regulation (EC) 1907/2006. Lumileds LLC will not intentionally add the following restricted materials to its products: lead, mercury, cadmium, hexavalent chromium, polybrominated biphenyls (PBB) or polybrominated diphenyl ethers (PBDE).

# Performance Characteristics

## Product Selection Guide

Table 1. Product selection for LUXEON Versat 2020 CW 150 at 20 ms MP, 150 mA,  $T_c = 25^\circ\text{C}$

| COLOR      | MINIMUM LUMINOUS FLUX <sup>[1]</sup> (lm) | TEST CURRENT (mA) | PART NUMBER        |
|------------|-------------------------------------------|-------------------|--------------------|
| Cool White | 48                                        | 150               | A1VB-5850A01000480 |
|            | 53                                        | 150               | A1VB-5850A01000530 |
|            | 58                                        | 150               | A1VB-5850A01000580 |

Notes for Table 1:

1. Lumileds maintains a tolerance of  $\pm 6.5\%$  on luminous flux measurements.

## Optical Characteristics

Table 2. Typical optical characteristics for LUXEON Versat 2020 CW 150 at 20 ms MP, 150 mA,  $T_c = 25^\circ\text{C}$

| PART NUMBER        | CORRELATED COLOR TEMPERATURE (K) |         | TOTAL INCLUDED ANGLE <sup>[1]</sup><br>$\theta_{0.90V}$ | VIEWING ANGLE <sup>[2]</sup><br>$2\theta_{1/2}$ |
|--------------------|----------------------------------|---------|---------------------------------------------------------|-------------------------------------------------|
|                    | MINIMUM                          | MAXIMUM |                                                         |                                                 |
| A1VB-5850A010xxxx0 | 5500                             | 6250    | 138°                                                    | 120°                                            |

Notes for Table 2:

1. Total angle at which 90% of total luminous flux is captured.
2. Viewing angle is the off axis angle from the LED centerline where the luminous intensity is  $\frac{1}{2}$  of the peak value.

## Electrical and Thermal Characteristics

Table 3. Typical electrical and thermal characteristics for LUXEON Versat 2020 CW 150 at 20 ms MP, 150 mA,  $T_c = 25^\circ\text{C}$

| PART NUMBER        | FORWARD VOLTAGE <sup>[1]</sup> ( $V_f$ ) |         | THERMAL RESISTANCE—JUNCTION TO CASE ( $^\circ\text{C/W}$ ) |         |                                            |         |
|--------------------|------------------------------------------|---------|------------------------------------------------------------|---------|--------------------------------------------|---------|
|                    |                                          |         | $R\theta_{j-c\text{ el}}$ <sup>[2]</sup>                   |         | $R\theta_{j-c\text{ real}}$ <sup>[3]</sup> |         |
|                    | MINIMUM                                  | MAXIMUM | TYPICAL                                                    | MAXIMUM | TYPICAL                                    | MAXIMUM |
| A1VB-5850A010xxxx0 | 2.70                                     | 3.49    | 13.0                                                       | 20.0    | 22.0                                       | 34.0    |

Notes for Table 3:

1. Lumileds maintains a tolerance of  $\pm 0.06\text{V}$  on forward voltage measurements.
2.  $R\theta_{j-c\text{ el}}$ : Electrical thermal resistance (junction to case).
3.  $R\theta_{j-c\text{ real}}$ : Real thermal resistance (junction to case) with wall plug efficiency included. Reference JESD51-51, JESD51-14, 4.1.3.

## Absolute Ratings

Table 4. Absolute ratings for LUXEON Versat 2020 CW 150

| PARAMETER                                                    | PERFORMANCE                                               |
|--------------------------------------------------------------|-----------------------------------------------------------|
| Minimum DC Forward Current                                   | 30 mA                                                     |
| Maximum DC Forward Current                                   | 250 mA                                                    |
| Maximum Junction Temperature <sup>[1]</sup>                  | 150 °C                                                    |
| Operating Case Temperature at Test Current <sup>[1]</sup>    | -40 °C to 125 °C                                          |
| Operating Case Temperature at Maximum Current <sup>[1]</sup> | -40 °C to 125 °C                                          |
| LED Storage Temperature                                      | -40 °C to 130 °C                                          |
| Soldering Temperature                                        | 260 °C                                                    |
| Allowable Reflow Cycles                                      | 3                                                         |
| ESD Sensitivity <sup>[2]</sup>                               | ±8 kV HBM, ±400 V MM, ±2 kV CDM                           |
| Reverse Voltage ( $V_{\text{reverse}}$ )                     | LUXEON LEDs are not designed to be driven in reverse bias |

**Notes for Table 4:**

1. Proper current derating must be used to maintain junction temperature below the maximum. LUXEON Versat LEDs driven at or above maximum LED case temperature may have shorter lifetime.
2. Measured using human body model (per JESD22 A114), machine model (per JESD22 A115) and charged device model (per JESD22 C101).

# Operating Limits Characteristics

Figure 9. Maximum forward current vs. case temperature for LUXEON Versat 2020 CW 150

Notes for Figure 9:  
1. LUXEON Versat LEDs driven at or above maximum LED case temperature may have shorter lifetime. Lumileds does not guarantee reliability of the board interconnect e.g. solder joint cracks caused by thermal mismatch.

# Permissible Pulse Handling Characteristics

Figure 10. Permissible pulse handling capability for LUXEON Versat 2020 CW 150

# Product Bin and Labeling Definitions

## Designing with LUXEON Versat 2020 CW 150

Flux bins supportable for car programs depend on product color and program start-of-production and end-of-production dates. Flux roadmaps by year and product color are maintained and available from the sales representative. Please contact a local sales representative to request the flux bin range with best supportability for program timing.

## Decoding Product Bin Labeling

In the manufacturing of semiconductor products, there are variations in performance around the average values given in the technical datasheets. For this reason, Lumileds bins the LED components for luminous flux or radiometric power, color point, peak or dominant wavelength and forward voltage.

LUXEON Versat 2020 CW 150 LEDs are labeled using a 4-digit alphanumeric CAT code following the format below:

**A B C D**

Where:

- A** – designates luminous flux bin (example: H = 58 lumens to 64 lumens)
- B C** – designates color code (1D, 2C, 3B, 4A)
- D** – designates forward voltage bin (example: B = 2.94 V to 3.20 V)

Therefore, a LUXEON Versat 2020 CW 150 with a lumen range of 58 to 64, color code of 3B and a forward voltage of 2.94 to 3.20 has the following CAT code:

**H 3 B B**

## Luminous Flux Bins

Table 6 lists the standard luminous flux bins for LUXEON Versat 2020 CW 150 emitters. Product availability in a particular bin varies by color and platform start of production date. Contact local sales representative for best supportability of programs.

**Table 5. Luminous flux bin definitions for LUXEON Versat 2020 CW 150,  $T_c = 25^\circ\text{C}$**

| BIN | LUMINOUS FLUX <sup>[1]</sup> (lm) |         |
|-----|-----------------------------------|---------|
|     | MINIMUM                           | MAXIMUM |
| F   | 48                                | 53      |
| G   | 53                                | 58      |
| H   | 58                                | 64      |
| J   | 64                                | 70      |

Notes for Table 5:

1. Lumileds maintains a tolerance of  $\pm 6.5\%$  on luminous flux measurements.

## Color Codes

Figure 11. Color bin structure in CIE 1931 color space for LUXEON Versat 2020 CW 150

Notes for Figure 11:

1. Lumileds supports the following bins for LUXEON Versat 2020 CW 150: HC, H5, H2 and H3.

## Color Bin Definitions

Table 6. Color bin definitions for LUXEON Versat 2020 CW 150

| COLOR BIN | x      | y      |
|-----------|--------|--------|
| HC        | 0.3325 | 0.3493 |
|           | 0.3169 | 0.3353 |
|           | 0.3185 | 0.3203 |
|           | 0.3323 | 0.3329 |
| H5        | 0.3325 | 0.3579 |
|           | 0.3151 | 0.3423 |
|           | 0.3168 | 0.3268 |
|           | 0.3324 | 0.3410 |
| H2        | 0.3109 | 0.3211 |
|           | 0.3131 | 0.3070 |
|           | 0.3256 | 0.3191 |
|           | 0.3249 | 0.3344 |
| H3        | 0.3249 | 0.3344 |
|           | 0.3401 | 0.3476 |
|           | 0.3412 | 0.3652 |
|           | 0.3242 | 0.3506 |

Notes for Table 6:

1. Lumileds maintains a tester tolerance of  $\pm 0.005$  on x and y color coordinates.
2. CIE 1931 x and y coordinate frame.

# Forward Voltage Bins

Table 7. Forward voltage bin definitions for LUXEON Versat 2020 CW 150

| BIN | FORWARD VOLTAGE <sup>(1)</sup> (V <sub>F</sub> ) |         |
|-----|--------------------------------------------------|---------|
|     | MINIMUM                                          | MAXIMUM |
| A   | 2.70                                             | 2.94    |
| B   | 2.94                                             | 3.20    |
| C   | 3.20                                             | 3.49    |

Notes for Table 7:

- 1. Lumileds maintains a tolerance of ±0.06V on forward voltage measurements.
- 2. Although several bins are outlined, product availability in a particular bin varies by production run and by product performance.

# Mechanical Dimensions

Figure 12. Mechanical dimensions for LUXEON Versat 2020 CW 150

Notes for Figure 12:

- 1. Drawings are not to scale.
- 2. All dimensions are in millimeters.

# JEDEC Moisture Sensitivity

Table 8. Moisture sensitivity levels for LUXEON Versat 2020 CW 150

| LEVEL | FLOOR LIFE |                  | STANDARD SOAK REQUIREMENTS |                 |
|-------|------------|------------------|----------------------------|-----------------|
|       | TIME       | CONDITIONS       | TIME                       | CONDITIONS      |
| 2     | 1 Year     | ≤30 °C / 60 % RH | 168 Hours +5 / -0          | 85 °C / 60 % RH |

# Packaging Information

## Pocket Tape Dimensions

Figure 13. Pocket tape dimensions for LUXEON Versat 2020 CW 150

### Notes for Figure 13:

1. Drawings are not to scale.
2. All dimensions are in millimeters.
3. Ao is the width of pocket, Ko is the depth of pocket, and Bo is the height of pocket.

## Reel Dimensions

Figure 14. Reel dimensions for LUXEON Versat 2020 CW 150

### Notes for Figure 14:

1. Drawings are not to scale.
2. All dimensions are in millimeters.

# Product Labelling

LUXEON Versat 2020 LEDs are packaged in moisture barrier bags on reels. Both moisture barrier bag and reels have printed information providing part numbers with CAT codes that indicate luminous flux bin, color bins and forward voltage bins.

Figure 15. Example of a reel label LUXEON Versat 2020 CW 150

- Notes for Figure 15:  
Field labels not described are for Lumileds internal use only.
- 1. Total number of LED emitters in a shipment box.
  - 2. Lumileds part number
  - 3. Customer part number for custom requests only.
  - 4. LED test date in YYWW format.
  - 5. Unique product lot identification number. This number is required for traceability purposes.
  - 6. Country code of origin of manufacturing of part (e.g. MY for Malaysia, CN for China) according to ISO 3166-1 alpha-2 document.
  - 7. Product bin n-digit alphanumeric CAT code.

## About Lumileds

Companies developing automotive, mobile, IoT and illumination lighting applications need a partner who can collaborate with them to push the boundaries of light. With over 100 years of inventions and industry firsts, Lumileds is a global lighting solutions company that helps customers around the world deliver differentiated solutions to gain and maintain a competitive edge. As the inventor of Xenon technology, a pioneer in halogen lighting and the leader in high performance LEDs, Lumileds builds innovation, quality and reliability into its technology, products and every customer engagement. Together with its customers, Lumileds is making the world safer, better and more beautiful—with light.
